Office Action Summary	Application No. 10/588,798	Applicant(s) BATTLE ET AL.	
	Examiner ALVIN J. GRANT	Art Unit 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-4 and 6-10** are rejected under 35 U.S.C. 102(b) as being anticipated by Jablonski DE 101 62 455.

Jablonski discloses a vacuum cleaner **(3)** including a suction unit and a flexible hose assembly **(2, 7, 8)** connected therewith, wherein the hose assembly includes at least two flexible sections **(7,8)** one of which has a smaller external diameter than the other and is slidable within the other, and wherein the at least two flexible sections are arranged to seal with one another at least when the at least two flexible sections are extended relative to one another **(Fig. 1)**; wherein the at least two flexible sections are corrugated; wherein the one of the at least two flexible sections having the smaller external diameter is stretchable from a natural short length to a longer length by applying an axial force **(Figs. 1, 2 and 6)**; the one of said at least two flexible sections having the smaller external diameter is retractable from a natural extended length to a shorter length **(Figs. 6 and 7)**; the shorter length is substantially equal to a length of the other of the at least two flexible sections diameter section; at least two flexible sections are provided with cooperating couplings that can be engaged with one another to retain

the at least two flexible sections in a compact configuration one within the other for storage (**Fig. 4**).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claim 5** is rejected under 35 U.S.C. 103(a) as being unpatentable over Jablonski.

Jablonski is described above. Jablonski does not specifically disclose that the hose is retractable by suction when the end of the hose is occluded. This feature is implied since the hose is extendable and contractible by force, and the negative pressure created by the vacuum is a force.
